

**DOBLE ENGINEERING COMPANY  
ESTABLISHES DOBLE AUSTRALASIA PTY. LTD.**

**August 12, 2005—Boston, MA**—Doble Engineering, world leader in diagnostic instruments and knowledge services for the electric power industry, is pleased to announce the formation of a new subsidiary company, Doble Australasia Pty. Ltd. in Brisbane, Australia.

Doble Australasia will provide sales assistance and real-time application engineering on all Doble's products, through out Australia, New Zealand, and the ASEAN countries of Philippines, Thailand, Malaysia, Vietnam, Singapore, Indonesia.

“By ensuring that Doble's customers in the Australasia market receive a high level of technical assistance and engineering support, we can strengthen our existing relationships throughout this region, “ said Robert Smith, President and Chief Executive Officer of Doble Engineering Company.

Doble Regional Sales Manager Mike O'Dowd will direct all activities of Doble Australasia. Karl Haubner, formerly of Western Power, will focus on high voltage apparatus. Murray Gillett, formerly of Energex, will be responsible for Protection. Noel Robinson will oversee repair support and service.

**About Doble**

Doble Engineering has been serving the electric power industry by providing diagnostic instruments, services and knowledge for 85 years. The company also maintains the industry's most extensive resource library of apparatus test results and knowledge. Doble has close working relationships with energy generation and delivery companies, as well as industrial power users, to improve the performance of their systems and operations.
