

What our participants had to say...

*“We had a 24-year-old transformer with some historical oil degradation and heating problems. That was before I attended Doble’s “Life of a Transformer” Seminar in 2006 and gained useful transformer knowledge as well as a better understanding of Doble Global Power Services’ capabilities. A worsening oil sample prompted me to have Doble Global Power Services evaluate the transformer. They conducted a series of tests: Power Factor, Sweep Frequency Response Analysis, Leakage Reactance, Dissolved Gas Analysis and other Laboratory tests. They also did an on-site internal inspection of the transformer and reviewed our historic test data. As a result, Doble Global Power Services was able to identify the issues the transformer was having. They also put me in contact with a substation service company to help with the internal inspection and the oil reclamation. **Thanks to Doble we now know what needs to be done to keep our transformer going for at least another fifteen years.**”*

*Joe Morley
Engineering & Operations Manager of
Braintree Electric Light Department*

*“Thank you for putting this together. It was my first time attending and I found it to be **very well organized** and very beneficial. The **presentations were great** and also **meeting others** in the same line of work and **growing my network was very helpful.**”*

Seminar Attendant

“The thing that I liked the best about this seminar was that it brought ‘The Best of the Best’ together in one room.”

*Joe Gilbert, P. Eng., Seminar Attendant
ENMAX Power Corporation*

“I liked this seminar because it gave me the opportunity to share and obtain knowledge and very good hints with some very experienced people.”

*Victor Flores, Seminar Attendant
FM Global*

What our participants had to say...

*"This was the best trade show we have ever attended. **Doble has put our company on the map!** A few years ago, nobody in this industry knew who we were. We started exhibiting at your Transformer Seminar, and now – it's amazing! People are coming up to our booth now, and they know us. **Now they are coming to buy from us!**"*

*Jim Hackett, Exhibitor
Colt Atlantic Services*

*"Overall, the seminar was very good (A+ grade). The **presenters were extremely knowledgeable**, the event was the **best planned** I've attended to date, the location is very good."*

Seminar Attendant

"Probably the best seminar I've been to since I began my career in Operations. And it was very practical - You didn't have to be a PhD to understand it!"

*Juan Holmes, Seminar Attendant
Santee Cooper*

*"The **expo is an asset** for new and young engineers starting out in the transformer industry. It is **hard to be aware of all the vendor options** out there **without an event like this** to experience them."*

Seminar Attendant

*"I would like to congratulate you to an excellent event. **I have not seen such an event in Europe and I could not imagine one to happen.** I really enjoyed the conference and **was impressed that 600 people would take a full week out of their busy schedules to attend.** I am sure it is worth every single day. "*

*Axel Kalt, Speaker
Head of Quality, ABB Power Transformers*

*"Excellent! Paul Griffin's knowledge, common sense approach and ability to communicate made this a **first-rate presentation!**"*

*Geo Urling, Seminar Attendant
Senior Electrical Sys. Engineer, Holland Board of Public Works*

"Vendor sponsored events were all excellent and very much appreciated."
