

Introducing DTAWeb v. 1.13.1

Version 1.13.1 of the DTAWeb software program is now available from www.doble.com. Version 1.13.1 adds various enhancements.

1.13.1 New Features

The following new features have been added.

- The Nameplate Note column now appears in the query builder.
- You can now delete T-Doble Library Plans from within the Manage Library Plan dialog box.
- New details have been added to the Oil Lab Test Results.
- You can now restrict the DTA file version that can be uploaded to DobleDatabase. A flag in the Database Manager is checked when files are uploaded to a given database.
- Enhancements have been made in Bushing analysis function:
 - Added the Out StdDev Region column in the Results grid. This column is populated after the plots are displayed.
 - Added "Exclude replaced bushings" checkbox.
 - Changed the checkbox to "Use nameplate value as benchmark for C1". When selected, the Delta PF or %Delta Cap for C1 is calculated using the nameplate value.
 - For C2, bushings with only ONE C2 test are excluded. For C1, when "Use nameplate value as benchmark for C1" is selected, bushings with missing nameplate PF or Cap are excluded. For C1, when "Use nameplate value as benchmark for C1" is not selected, bushings with only ONE C1 test are excluded.

1.13.1 Bug Fixes

- The query result size is now estimated and flagged when limit is exceeded (dbs:1000, cols=50, rows=200000).
- Corrected the sorting routine for the Test Date column in the DTA Uploader form.
- Fixed the merge function to include the YearMfg in the dbo.DobleApparatus table.
- Fixed the bugs for Database Groups selection and query.
- Files larger than 200 MB can now be uploaded and downloaded.

- Changed the dialog title to Create Transformer Alias and disabled the Manufacturer label to denote that it cannot be edited.
- Added DTA Version and Firmware Version fields under the Administrative Data section.
- In Limit File Manager, Compare filter includes existing destination records.
- Corrected the tap changer merge routine to include the winding field.
- Added Line Frequency, Factory Calibration Date, Factory Recalibration Due Date, and Field Calibration Date under the Administrative Data section.
- Changed the dialog title to Map a Transformer Alias and disabled the Manufacturer label to denote that it cannot be edited.
- Corrected the DETC and LTC displayed in the query results for LR Tests.
- Corrected the uploader for CT Turns Ratio test to use RequestedTestKV when TestKV is missing.
- Added Upload Date field to query builder.
- Corrected the LCM upload routine to skip the DTA version check.
- Corrected the plotting of selected bushing markers in Bushing Analysis.
- Refreshed the Bushing Analysis Results Grid when the selection is changed for Exclude Replaced Bushings and 'Use nameplate value as benchmark for C1' options.

Downloading DTAWeb v. 1.13.1

To download DTAWeb v. 1.13.1:

1. Open www.doble.com in your browser.
2. Click the **Support** button and select the **Downloads** option.
3. On the Downloads page, click the **DTAWeb Setup** link.
4. Click **Save** to download the file.

Operating System Compatibility

DTAWeb v. 1.13.1 is intended for use with the Microsoft Windows 7, 8, and 10 operating systems.

Backward Compatibility

Version 1.13.1 of DTAWeb can open files that were created with any previous version of DTAWeb. Previous versions can continue to open the files even after they have been used in DTAWeb.

Installation under Microsoft Windows 7, 8, and 10

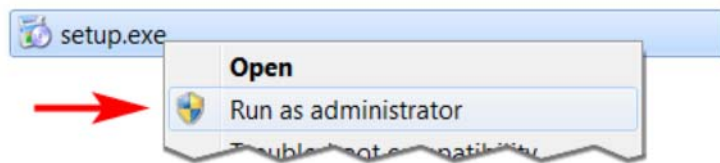

Windows 7, 8, and 10 have a **unique installation requirement** that you must meet for your Doble software to run properly. Do the following:

1. Close any previous version of DTAWeb that is running on your PC.
2. Download and unzip the DTAWeb v. 1.13.1 software file.

CAUTION! Do not double-click the setup.exe file! Double-clicking results in an incorrect installation that you will have to un-install later.

3. Right-click the **setup.exe** file.
4. Select **Run as administrator**.

Note: You can also use this procedure to install DTAWeb v. 1.13.1 under MS Windows XP or Vista. DTAWeb v. 1.13.1 is not tested under these operating systems and compatibility is not assured.
