

dobleASSURANCE™

ALL-INCLUSIVE 10-YEAR TRANSFORMER MONITORING PROGRAM

OPTIMIZE PROGRAM COSTS | IMPROVE MONITOR AVAILABILITY | MANAGE RISK

The Challenge

Maximize the return on your on-line transformer monitoring program investment through the dobleASSURANCE™ program, an all-inclusive 10-year monitoring program covering professional project implementation services, on-site monitor preventative maintenance including consumables replacement, and any required monitor condition-based corrective services. Under the program, if your Calisto or doblePRIME™ equipment requires factory repair, Doble will promptly commission a replacement monitor.

All Doble on-line transformer monitoring solutions are eligible for dobleASSURANCE programs which can be contracted by asset owners for both new and legacy transformers. Doble can also provide as a pass-through program via transformer manufacturers or monitoring system integrators so capital budgets may be utilized.

Manage critical asset risk more accurately and efficiently. Enjoy peace-of-mind from one of the most respected service providers in the electric power industry—that's dobleASSURANCE™.

Choose Doble

- Known 10-Year Total Cost of Ownership
- Intelligent Expert Analytics
- Morgan Schaffer Calisto DGA Monitors
- doblePRIME IDD True PowerFactor™
- Comprehensive Partial Discharge Analysis
